## Summary of "Out of range" parameters

| Analyte Name | Current Value | Previous Value 1 | Previous Value 2 | Units | Reference Range |
|---|---|---|---|---|---|
| **COMPLETE BLOOD COUNT WHOLE BLOOD** | | | | | |
| RBC Count | **5.69** | - | - | mill/mm3 | 4.50 - 5.50 |
| Monocytes | **10.20** | - | - | % | 2.00 - 10.00 |
| **LIPID PROFILE BASIC SERUM** | | | | | |
| LDL Cholesterol Direct | **125** | - | - | mg/dL | <100 |
| Non-HDL Cholesterol | **142** | - | - | mg/dL | <130.00 |
| **LIVER & KIDNEY FUNCTION TEST SERUM** | | | | | |
| Creatinine | **1.53** | - | - | mg/dL | 0.70 - 1.30 |

*T&C apply.

## Details of "Out of range" parameters

We have observed that the below parameters have shown 'out of range' results, which may have an impact on your health.

### COMPLETE BLOOD COUNT WHOLE BLOOD - RBC Count

RBC Count is the number of red blood cells (erythrocytes) in a blood sample.

**Impact on overall health?**

High RBC count may be due to dehydration, bone marrow disorders, cardiac conditions ,lung diseases or smoking. It is also seen in people living in high altitude.

**Report Trend # - Compare current & past value**

# Past value would come if test done at Dr Lal Path Labs.

Your Result Value

**5.69** mill/mm3

Need attention

Normal Value

4.50 - 5.50 mill/mm3

Current test value analysis

### COMPLETE BLOOD COUNT WHOLE BLOOD - Monocytes

Monocytes are white blood cells that clean up cell debris during an infection. They also help alert other white blood cells to harmful intruders in the body like bacteria and viruses.

**Impact on overall health?**

A high monocyte count may be due to chronic infections,chronic inflammatory conditions or autoimmune disorders

**Report Trend # - Compare current & past value**

# Past value would come if test done at Dr Lal Path Labs.

Your Result Value

**10.20** %

Need attention

Normal Value

2.00 - 10.00 %

Current test value analysis

*T&C apply.

## Details of "Out of range" parameters

We have observed that the below parameters have shown 'out of range' results, which may have an impact on your health.

### LIPID PROFILE BASIC SERUM - LDL Cholesterol Direct

Low-density lipoprotein (LDL) often known as the 'bad' cholesterol ,is a cardiovascular risk marker and is used for cardiovascular risk assessement

**Impact on overall health?**

High amounts of LDL can build up in the arteries as plaque if left unchecked. Too much plaque buildup restricts blood flow and increases the risk of cardiovascular diseases.

**Report Trend # - Compare current & past value**

# Past value would come if test done at Dr Lal Path Labs.

Your Result Value

**125** mg/dL

Need attention

Normal Value

<100 mg/dL

Current test value analysis

### LIPID PROFILE BASIC SERUM - Non-HDL Cholesterol

Non-HDL cholesterol includes all the cholesterol in the blood that isn't HDL

**Impact on overall health?**

High non HDL cholesterol levels are harmful and could lead to various serious diseases like coronary artery disease. It may also lead to plaque build-up in artery wall.

**Report Trend # - Compare current & past value**

# Past value would come if test done at Dr Lal Path Labs.

Your Result Value

**142** mg/dL

Need attention

Normal Value

<130.00 mg/dL

Current test value analysis

*T&C apply.

## Details of "Out of range" parameters

We have observed that the below parameters have shown 'out of range' results, which may have an impact on your health.

### LIVER & KIDNEY FUNCTION TEST SERUM - Creatinine

Creatinine is a waste product that is produced by muscles in the body. This test measures the amount of creatinine in the blood.

**Impact on overall health?**

Healthy kidneys filter creatinine out of the blood & it exits the body as a waste product in urine. High creatinine levels may be an indication of impaired kidney function, dehydration or muscle injury.

**Report Trend # - Compare current & past value**

# Past value would come if test done at Dr Lal Path Labs.

Your Result Value

**1.53** mg/dL

Need attention

Normal Value

0.70 - 1.30 mg/dL

Current test value analysis

*T&C apply.

## Detailed reports

### COMPLETE BLOOD COUNT WHOLE BLOOD

Complete blood count (CBC) test helps detect health conditions, disorders, and infections using a small amount of blood. This test measures blood components like red blood cells , white blood cells, platelets , red cell indices.

| Analyte Name | Current Value | Previous Value 1 | Previous Value 2 | Units | Reference Range |
|---|---|---|---|---|---|
| Hemoglobin | 14.60 | - | - | g/dL | 13.00 - 17.00 |
| Packed Cell Volume (PCV) | 49.70 | - | - | % | 40.00 - 50.00 |
| RBC Count | **5.69** | - | - | mill/mm3 | 4.50 - 5.50 |
| MCV | 87.30 | - | - | fL | 83.00 - 101.00 |
| Mentzer Index | 15.3 | - | - | | |
| MCH | **25.70** | - | - | pg | 27.00 - 32.00 |
| MCHC | **29.40** | - | - | g/dL | 31.50 - 34.50 |
| Red Cell Distribution Width (RDW) | **14.50** | - | - | % | 11.60 - 14.00 |
| Total Leukocyte Count (TLC) | 5.19 | - | - | thou/mm3 | 4.00 - 10.00 |
| Segmented Neutrophils | 48.60 | - | - | % | 40.00 - 80.00 |
| Lymphocytes | 38.70 | - | - | % | 20.00 - 40.00 |
| Monocytes | **10.20** | - | - | % | 2.00 - 10.00 |
| Eosinophils | 2.10 | - | - | % | 1.00 - 6.00 |
| Basophils | 0.40 | - | - | % | <2.00 |
| Neutrophils | 2.52 | - | - | thou/mm3 | 2.00 - 7.00 |
| Lymphocytes | 2.01 | - | - | thou/mm3 | 1.00 - 3.00 |
| Monocytes | 0.53 | - | - | thou/mm3 | 0.20 - 1.00 |
| Eosinophils | 0.11 | - | - | thou/mm3 | 0.02 - 0.50 |
| Basophils | 0.02 | - | - | thou/mm3 | 0.02 - 0.10 |
| Platelet Count | 294 | - | - | thou/mm3 | 150.00 - 410.00 |
| Mean Platelet Volume | 9.9 | - | - | fL | 6.5 - 12.0 |

*T&C apply.

## Detailed reports

### SUGAR CHOICE PLASMA

Glucose Fasting measures the level of glucose in the blood after an 8 to 12 hour overnight fast.

| Analyte Name | Current Value | Previous Value 1 | Previous Value 2 | Units | Reference Range |
|---|---|---|---|---|---|
| Glucose Fasting | 80.00 | - | - | mg/dL | 70.00 - 100.00 |

### HbA1c WHOLE BLOOD

HbA1c test measures how much glucose is bound to the haemoglobin.

| Analyte Name | Current Value | Previous Value 1 | Previous Value 2 | Units | Reference Range |
|---|---|---|---|---|---|
| HbA1c | 5.6 | - | - | % | 4.00 - 5.60 |
| Estimated average glucose (eAG) | 114 | - | - | mg/dL | - |

### LIPID PROFILE BASIC SERUM

Lipid Profile test is used to assess the risk of developing heart disease by measuring the amount and type of fats (lipids) in the blood.

| Analyte Name | Current Value | Previous Value 1 | Previous Value 2 | Units | Reference Range |
|---|---|---|---|---|---|
| Cholesterol Total | 186 | - | - | mg/dL | <200.00 |
| Triglycerides | 106 | - | - | mg/dL | <150.00 |
| HDL Cholesterol | 44 | - | - | mg/dL | >40.00 |
| LDL Cholesterol Direct | **125** | - | - | mg/dL | <100 |
| VLDL Cholesterol | 21 | - | - | mg/dL | <30.00 |
| Non-HDL Cholesterol | **142** | - | - | mg/dL | <130.00 |

*T&C apply.

## Detailed reports

### LIVER & KIDNEY FUNCTION TEST SERUM

A Liver and Kidney Panel is a group of blood tests that are performed together to detect, evaluate, and monitor liver health and kidney function.

| Analyte Name | Current Value | Previous Value 1 | Previous Value 2 | Units | Reference Range |
|---|---|---|---|---|---|
| Creatinine | **1.53** | - | - | mg/dL | 0.70 - 1.30 |
| GFR Estimated | 61 | - | - | mL/min/1.73m2 | >59 |
| GFR Category | G2 | - | - | - | - |
| Urea | 42.00 | - | - | mg/dL | 13.00 - 43.00 |
| Urea Nitrogen Blood | 19.61 | - | - | mg/dL | 6.00 - 20.00 |
| BUN/Creatinine Ratio | 13 | - | - | - | - |
| Uric Acid | 4.80 | - | - | mg/dL | 3.50 - 7.20 |
| AST (SGOT) | 29.0 | - | - | U/L | 15.00 - 40.00 |
| ALT (SGPT) | 37.0 | - | - | U/L | 10.00 - 49.00 |
| AST:ALT Ratio | 0.78 | - | - | - | <1.00 |
| GGTP | 25.0 | - | - | U/L | 0 - 73 |
| Alkaline Phosphatase (ALP) | 66.00 | - | - | U/L | 30.00 - 120.00 |
| Bilirubin Total | 0.83 | - | - | mg/dL | 0.30 - 1.20 |
| Bilirubin Direct | 0.25 | - | - | mg/dL | <0.3 |
| Bilirubin Indirect | 0.58 | - | - | mg/dL | <1.10 |
| Total Protein | 7.20 | - | - | g/dL | 5.70 - 8.20 |
| Albumin | 4.80 | - | - | g/dL | 3.20 - 4.80 |
| A : G Ratio | 2.00 | - | - | - | 0.90 - 2.00 |
| Globulin(Calculated) | 2.40 | - | - | gm/dL | 2.0 - 3.5 |
| Calcium Total | 9.70 | - | - | mg/dL | 8.70 - 10.40 |
| Phosphorus | 3.60 | - | - | mg/dL | 2.40 - 5.10 |
| Sodium | 141.00 | - | - | mEq/L | 136.00 - 146.00 |
| Potassium | 4.27 | - | - | mEq/L | 3.50 - 5.10 |
| Chloride | 101.73 | - | - | mEq/L | 101.00 - 109.00 |

*T&C apply.

## Detailed reports

### THYROID PROFILE FREE SERUM

Thyroid profile test helps to evaluate the functioning of thyroid gland in the body. This profile indicates whether thyroid gland is under-functioning or over-functioning or the function is normal.

| Analyte Name | Current Value | Previous Value 1 | Previous Value 2 | Units | Reference Range |
|---|---|---|---|---|---|
| Free Triiodothyronine (T3 Free) | 3.97 | - | - | pg/mL | 2.30 - 4.20 |
| TSH Ultrasensitive | 1.624 | - | - | µIU/mL | 0.550 - 4.780 |
| Free Thyroxine (T4 Free) | 1.32 | - | - | ng/dL | 0.89 - 1.76 |

*T&C apply.

## Detailed reports

### VITAMIN B12 SERUM

Vitamin B12 is an essential water-soluble vitamin that plays an important role in red blood cell formation, nerve function & production of DNA that carries information about our genes.

| Analyte Name | Current Value | Previous Value 1 | Previous Value 2 | Units | Reference Range |
|---|---|---|---|---|---|
| Vitamin B12; Cyanocobalamin | 476.00 | - | - | pg/mL | 211.00 - 911.00 |

### VITAMIN D 25 - HYDROXY SERUM

Vitamin D is a nutrient required by the body to maintain healthy bones. It also supports the health of our immune system, muscle & brain.

| Analyte Name | Current Value | Previous Value 1 | Previous Value 2 | Units | Reference Range |
|---|---|---|---|---|---|
| Vitamin D 25 Hydroxy | 80.72 | - | - | nmol/L | 75.00 - 250.00 |

*T&C apply.

# Do's and Don'ts

*Hello Mr. PUSHKAR CHAUHAN,*

Here are some personalised recommendations for you on your diet and lifestyle

## Diet Recommendations

### Choose Lean Protein Sources

Choose moderate portions of high-quality protein like lean meats, fish, tofu, legumes, or eggs. Avoid overconsuming animal proteins, especially red and processed meats.

### Limit alcohol intake

If you drink, Limit alchol intake, do so in moderation, and always with food.

### Kidney-Friendly Diet (Low Sodium, Phosphorus, Potassium and Protein)

Eat fresh, unprocessed foods. Use herbs and spices instead of salt for flavoring. Avoid processed foods, canned soups, salty snacks, and restaurant meals.

### Eat Antioxidant-Rich Foods

Eat a variety of colorful vegetables, berries, and fruits. Focus on foods like berries, bell peppers, kale, carrots, sweet potatoes, and green tea.

### Eat Small, Frequent Meals

Plan meals in advance and have healthy snacks available to prevent unnecessary overeating or choosing high-sugar options.

### Consume Spices and Herbs

Include turmeric (curcumin), garlic, ginger, and dandelion root in your diet.

Diet consultations are based on blood reports focussing on your specific health markers. For a comprehensive dietary plan, other factors such as lifestyle, medical history, and physical condition must be considered. **Doctors' consultation recommended for a personalised approach.**

## Lifestyle Recommendations

### Physical Activity

Aim for 45-60 minutes of moderate-intensity aerobic activity (walking, cycling) per week, along with strength training 2-3 times a week.

### Maintain Healthy Weight & Quality sleep

Maintain a healthy weight through diet and exercise and aim for 7-9 hrs of quality sleep every night.

### Stay Hydrated

Drink enough water to stay hydrated, but follow your healthcare provider's advice on fluid intake, especially if you have fluid retention.

### Quit Smoking

Quitting smoking improves health, reduces the risk of premature death, and lowers the risk of smoking-related diseases like heart disease, cancer, and COPD.

### Blood Pressure

Monitor blood pressure regularly.

### Stress Management

Incorporate relaxation techniques such as yoga, deep breathing, meditation, or mindfulness to reduce stress.

*T&C apply.

By making these adjustments, you can significantly improve your overall health and reduce the risks associated with his current lifestyle choices. Consistency and gradual progress in adopting healthier habits will lead to long-term benefits for your well-being.
